

FlexConnect

FlexTEL is pleased to offer an IP Trunking solution to its customers as a worry free, fully managed telecommunication solution, therefore allowing enterprises to gain far greater control over optimizing their return on their IT investments. FlexTEL's IP Trunking solution allows customers that currently have an on premise IP PBX to connect to FlexTEL as a Service Provider.

FlexTEL IP Trunking is the next step in allowing enterprises to go beyond the voice-centric nature of IP PBXs and rewards additional cost savings. With the dependency on the traditional PSTN reduced, cost savings are experienced almost immediately along with a higher ROI.

As your enterprise grows, FlexTEL's IP Trunking solution is ready to grow with you. In addition

to the initial and ongoing cost saving benefits, the fear of scaling your telecommunication solution is removed. Dynamically growing your IP Trunking proportionally based on your Enterprise's growth, allows for a seamless, cost efficient, and non-complex alternative to the traditional planning that goes around PSTN upgrades. This also removes the requirement of additional hardware, which reduces the cost and time to scale your IT investment.

FlexTEL's IP Trunking solution makes it easy to move your telecommunication solution to the next stage; moving the IP PBX solution into the cloud and gaining full benefits, increased cost savings, reliability, maintenance free and security.
